

Manafreethers

Forward

ManyFeathers is an expression of the big picture. As we all walk in this world, there are many hearts that beat to the individual experience, expressions and singular perspectives of the whole big picture...

At the start we're born, innocent and pure... everything after that, well... is a learning process and then filtered through us as we grow... we each have a story...

Many faces... many colors... many ethnicities... many emotions... many potentials... many intentions... many choices... many places... on one world... floating on a ball in space... surrounded by many galaxies and many suns...

...so, is it safe to say... that there are many on many other planes of existence?
...contributing their perspectives also to this one experience...

There is no greater than, less than, better or worse... all just spectrums of experience... the further one pulls the camera back, the easier it is to see the one experience we all share...

ManyFeathers on one bird... many as one

Remove the barriers, borders and seeing the differences... see the sameness...
we all have heartbeat and breath...

No one controls you, you control no one or nothing but how you respond, react
and what choices you make...

Selfless not selfish...

I am ManyFeathers... tribe of one, all names or none

All songs written recorded and performed by Alex Remlinger
All songs recorded on a KORG D1200 MKII — 12 track recorder

Piano on track 3 by Gina Martin

Tracks 3, 4, 7, and 9 recorded in 432hz*

Mastered by Shawn Franklin for TDX

Cover concept by Alex Remlinger

Layout and design by Michael Gregoire

Based on original art by Aaron Cote

**A = 432 Hz, is an alternative tuning that is mathematically consistent with the universe.*

Music based on 432Hz transmits beneficial healing energy, because it is a pure tone of math fundamental to nature.

The Beginning

1:28

Written / recorded 2013

Me 2 Me

3:10

Written / recorded 2009

Oooh don't you go
Oh you better not go
Away on a battleship sunk by a karma hit then you will come back digging graves

Oooh you better not go
Oh don't you go.
Away like a microchip frozen and emotionless , no pain , you'll never learn that way

I caught me spying on myself
Sailing on a rocket ship
Systems with no radar blips
And you
To guide me by my side

It's nice to meet again old friend
In another life

It's nice to meet again old friend

In another light

Silence and Conviction

2:22

Written 2002 / recorded 2016

If man could smell fear
Watch his sons and daughters disappear

With low resolution
The grain in my soul is getting clear

A tragic inquisition
There's still
Blood on my face

But I keep hope alive

With a smile on my face
Silence and conviction
Expressions lost it place
And so has tradition
but I'll hold my ground

Seems like
The lines in my face look like tears

But I'll still stare you down

With a smile in my eye
Silence and Conviction
The strength to survive
With anger in submission
I'll hold my ground

Footprint in the Snow

4:00

Written 2014 / recorded 2016

It's only gone when you go
Your only a footprint in the snow
And time is here to let you know
Your only gone when you go

Sometimes I get snow blind
Sun so bright with no light inside

Will you show me your light
I'm feeling the darkness inside
Will you hold me tonight
I'm feeling the darkness inside

Sometimes I lose my mind
My soul ain't right
When my hearts not aligned

When you see the Holy Ghost

Don't turn around , don't run
Your going... home

Will you show me your light
I'm feeling the darkness inside
Will you hold me tonight
Will you show me your light
I'm feeling the darkness inside

Sometimes I lose my mind
My soul ain't right
When my hearts not aligned

Stargazer

2:15

Written / recorded 2009

Systems in check
Everything's aligned
Seven sisters said to me use you heart
And not your mind

The notches in Orion's Belt hold the sword of truth inside
The archer pulls his arrow back
And shoots a bull right in the eye

Eye of the Storm

3:46

Written 2009-/ recorded 2010

Star struck and searching for home
It ain't easy ya know
I never thought I'd ever let it go
It ain't easy... ya know

I thought I was broken
Sitting alone with my rose
But what I didn't know then it pushed my heart open... to the core

It ain't easy... yeah... when you're all alone

But what I didn't know then it pushed my heart open... to the core

I turned around and noticed my heart was in focus
In the eye of the Storm

And I walked away
It ain't easy yeah...
Beautiful and strong
And I walked away
And I walked away
And I walked away
Beautiful and strong

What I didn't know then it pushed my heart open to the core
I turned around and noticed my heart was in focus
In the eye of the Storm

My Heart

2:48

Written 2007 / recorded 2016

Taste the times of your life
Cause It's all you'll ever know

And Take the time to grow grow grow
Before you never know

You mean everything to me
I tell you all the time... you know

And Go to sleep and dream
About all the things you wanna be

Stay awake and dream
About all the things you wanna see

Cause You mean everything to me
I tell you all the time
...you know

Destiny Calls

3:28

Written / recorded 2011

You feel that frost
In the hearts of the souls that are lost
Where will you be when destiny Calls
I will be there
Will you be there?

You see them ghosts
Walking round in a circle of smoke
Where will you be when destiny Calls
I will be there
Will you be there?

Don't you believe?
That your love can set you free
Don't you perceive in what's not there?
I will be there
Will you be there?

You see them walls
I seen em in you funeral homes
Where will you be when destiny Calls
I will be there
Will you be there?

Don't you believe?
That your love can set you free
Don't you perceive in what's not there?
I will be there
Will you be there?

Stand up

3:36

Written 2014 / recorded 2016

Spend a little time inside
And you'll be alright
Take a little time away
And just breathe with me
And everything's gonna be alright

Stand Up
Stand Up and hold my hand
Stand tall
Stand tall and hold your ground
And everything's gonna be alright

Feel our hands meet
feel our hearts beat
As one

There's a tiny space in your heart

That just says... beat with me
And everything's gonna be alright

with every little piece of me yeah
I just beat with love for you
In your heart

Stand Up
Stand Up and hold your ground
Stand tall
Stand tall and hold your ground
And everything's gonna be alright

Feel our hands meet
Feel our hearts beat
As one

Dancing with the Sun

1:27

Written / recorded 2012

My soul dances with/in the Sun
My soul dances with as one/with the Sun
I am a bringer of the dawn
Where the light and the dark become one
Birds silhouettes against the Sun/birds fly against the silhouette of the Sun
And the serpent spirals proudly at the Sun
Around the sun

And the rainbow serpent smiles at the Sun
And the souls dance as one
And the soul dances as one
